## Spalding DeDecker Associates, Inc. hires David L. Nepper, PS as a Survey Project Manager

Rochester Hills, MI (April 1, 2014) - Spalding DeDecker Associates, Inc. (SDA), a national civil engineering, landscape architectural, and surveying firm, hires David L. Nepper, PS as a Project Manager within their Survey Department. With more than 10 years of experience in the surveying field, Mr. Nepper will manage survey projects for both municipal and private development clients.

Mr. Nepper earned a Bachelor of Science in Surveying Engineering in 2004 from Ferris State University in Big Rapids, Michigan. Mr. Nepper holds Professional Surveying licenses in Michigan, Ohio, Indiana, Iowa, and Wisconsin. He is also a Certified Storm Water Operator.

Mr. Nepper's primary focus will be client development in the fields of transmission power lines, alternative energy (wind and solar farms), and retail / private work. As SDA's existing survey department has doubled in size within the past two years, Dave will also provide support to the current project managers, ensuring continued high quality work, client satisfaction, and success.

Dave's experience managing field and office operations, his business development strategies and implementation policies, and his overall accountability for all aspects of project performance make him an indispensable internal resource and great asset to our clients. "In the competitive market we find ourselves in, the ability to be multi-dimensional and effectively manage a variety of different projects is essential. Dave has the qualities we were looking for, like flexibility, leadership, and teamwork, to go along with his enthusiasm and initiative. I am confident that Dave will go above and beyond what is required to help our business succeed and welcome him to our team," said George Platz, PS, Director of Surveying.

Established in 1954 and celebrating its 60<sup>th</sup> year in business, Spalding DeDecker Associates, Inc. is an employee-owned consulting engineering and surveying firm specializing in infrastructure, land development, landscape architecture, and surveying. With regional offices in Detroit and Rochester Hills, Michigan, and San Antonio, Texas, and several field offices, SDA offers a diverse set of skills to clients who seek solutions to construct and maintain their infrastructure. The firm offers municipal engineering, construction engineering, forensic engineering, transportation engineering, land development, landscape architectural, pavement management, and land surveying services.
