

Beaumont Hospital – Life Care Campus

Independence Township, Michigan

Spalding DeDecker Associates, Inc. (SDA) prepared site plans and construction documents for a planned 70-acre unit development located at I-75 and M-15. Site planning challenges included designing sensitive site access, site visibility, and stormwater management strategies that were acceptable to adjacent residents as well as the Township Planning Commission.

Phase I of the project included a medical office / ambulatory care center, nursing home, and 18-acre wellness/nature park. Future phases will include a 100-bed community hospital and wellness center along with the widening of M-15.
