

## Beaumont Hospital / ProCure Treatment Centers – Proton Therapy Center Royal Oak, Michigan

**Spalding DeDecker Associates, Inc. (SDA)** was asked to prepare site plans and construction documents for a \$159 million Proton Therapy Center, the first such cancer treatment center in the state.

Project challenges were based around the state's mandated opening of the facility in 2010. To meet this deadline, SDA issued five separate construction document packages for required infrastructure improvements that Beaumont Hospital needed to complete before ProCure could begin work on the building itself.

SDA coordinated with ProCure, Beaumont, designers, construction managers, and City staff to complete timely relocation of utilities and parking lot access roads in addition to the construction of a new 160,000 cubic foot underground detention facility.
